a. Click Get Started

b. Sign Up using your email/gmail

c. Download Ninjatrader Platform to your PC

Step 2: Get Market Data

To use the OrderFlow Trader Lab Footprint Chart, you need an active NinjaTrader 8-compatible market data connection.

Your data provider supplies the real-time and historical market data that NinjaTrader uses to build the Footprint Chart.

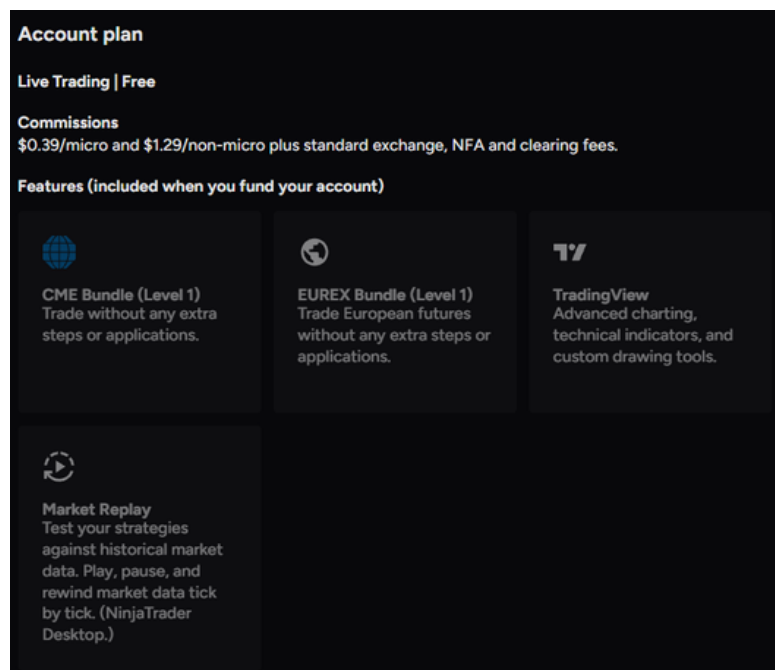

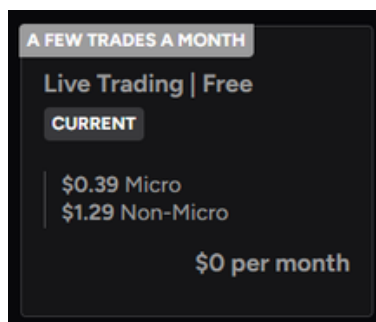

OPTION 1 - Ninjatrader Market Data

If you have a funded NinjaTrader live trading account, you can receive real-time market data through NinjaTrader at no additional market-data subscription cost, subject to the applicable exchange and account requirements.

Setup:

1. Open or fund your NinjaTrader live account.
2. Make sure the futures market you want to trade is enabled on your account.
3. Open NinjaTrader 8 Desktop.
4. Connect to your NinjaTrader account.
5. Confirm that your instrument is receiving live data.

Recommended for: Traders who use NinjaTrader as their broker.

OPTION 2 - dxFeed [Recommended]

dxFeed provides real-time and historical market data that can be connected to NinjaTrader 8.

This is a good option if you want a dedicated market-data provider without opening a NinjaTrader brokerage account.

After subscribing, follow dxFeed's instructions to connect your data feed to NinjaTrader 8.

OPTION 3 – Rithmic / Prop Firm

If you trade through a futures prop firm, your market data may already be provided through Rithmic or another supported connection. Check with your prop firm for the correct connection and login credentials.

OPTION 4 – Other Supported Providers

NinjaTrader 8 supports additional market-data providers, including providers such as Kinetick and IQFeed.

If you choose another provider, make sure your subscription provides the real-time and historical tick data required by your NinjaTrader setup.

IMPORTANT – Tick Replay

The OrderFlow Trader Lab Footprint Chart requires Tick Replay to be enabled. Before purchasing a data feed, make sure it provides the historical tick data required for your NinjaTrader Tick Replay setup.

Once your market data is connected, continue to Step 3.

Step 3:

To use the OrderFlow Trader Lab Footprint Chart, you need an active NinjaTrader 8-compatible market data connection.

Your data provider supplies the real-time and historical market data that NinjaTrader uses to build the Footprint Chart.

OPTION 1 - Ninjatrade Market Data

If you have a funded NinjaTrader live trading account, you can receive real-time market data through NinjaTrader at no additional market-data subscription cost, subject to the applicable exchange and account requirements.
